Course curriculum for STAG18 Applied Multivariate Methods

1. General information
   1. Name: Applied Multivariate Methods
   2. Level: Basic (G1F)
   3. Credit points: 7.5; ECTS-credits: 7.5
   4. Approved by the Board of Directors at the Department of Statistics, School of Economics and Management, Lund University, 2014-10-20

2. Course placement within the educational system
   1. Subject: Statistics
   2. This is a basic level course
   3. The course is offered in English.

3. Learning outcomes
   On a general level the students should be able to understand the concept of analysing univariate and multivariate data.
   On successful completion of the course the student
   • will appreciate the range of multivariate techniques available,
   • will be able to summarize and interpret univariate and multivariate data,
   • will have an understanding of the link between multivariate techniques and corresponding univariate techniques,
   • will be able to use the techniques appropriately, and draw appropriate conclusions.

4. Course content
   The course is divided into 6 blocks: Basic inferential statistics, analysis of variance, multiple linear regression, logistic regression, factor analysis and cluster analysis. The course covers theoretical, computational, and interpretive issues of these different types of analyses using computer solutions.

5. Teaching and assessment
   The course is designed as a series of lectures, computer exercises and assignments with reports. Grading is based on a written exam.

Note
The university views plagiarism very seriously, and will take disciplinary actions against students for any kind of attempted malpractice in examinations and assessments. Plagiarism is considered to be a very serious academic offence. The penalty that may be imposed for this, and other unfair practice in examinations or assessments, includes suspension from the University for a specified period.
6. Grading scale
At the School of Economics and Management grades are awarded in accordance with a criterion-based grading scale A-F:

A: Excellent
B: Very good
C: Good
D: Satisfactory
E: Sufficient
F: Fail

Students have to receive a grade of E or higher in order to pass a course.

<table>
<thead>
<tr>
<th>GRADE</th>
<th>CHARACTERISTIC</th>
<th>PERCENT</th>
<th>CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>100-85</td>
<td>A distinguished result that is excellent with regard to the following aspects – theoretical depth, practical relevance, analytical ability and independent thought.</td>
</tr>
<tr>
<td>B</td>
<td>Very good</td>
<td>84-75</td>
<td>A very good result with regard to the above mentioned aspects.</td>
</tr>
<tr>
<td>C</td>
<td>Good</td>
<td>74-65</td>
<td>The result is of a good standard with regard to the above mentioned aspects and lives up to expectations.</td>
</tr>
<tr>
<td>D</td>
<td>Satisfactory</td>
<td>64-55</td>
<td>The result is of a satisfactory standard with regard to the above mentioned aspects and lives up to expectations.</td>
</tr>
<tr>
<td>E</td>
<td>Sufficient</td>
<td>54-50</td>
<td>The result satisfies the minimum requirements with regard to the above mentioned aspects, but not more.</td>
</tr>
<tr>
<td>F</td>
<td>Fail</td>
<td>49-0</td>
<td>The result does not meet the minimum requirements with regard to the above mentioned aspects.</td>
</tr>
</tbody>
</table>

7. Prerequisites
The students should have completed STAA30 Statistics Basic Course or an equivalent course.

8. Literature
See separate document.
