LUND UNIVERSITY

School of Economics and Management

Department of Statistics

SEMINAR

Wednesday 28 September 2011 at 13.15 in room Alfa1-1048.

Helle Rootzen, DTU

E-learning in mathematics and statistics

How can e-learning be used in mathematics and statistics? Not for distance learning but when the students are on campus. Can it be combined with more traditional learning – such as lectures and exercises? I will tell about our experiences at DTU and show some examples. The examples will mainly be from e-math – a web based mathematics course and from our video recordings of different courses in statistics.

Welcome!
